### About Radius Care

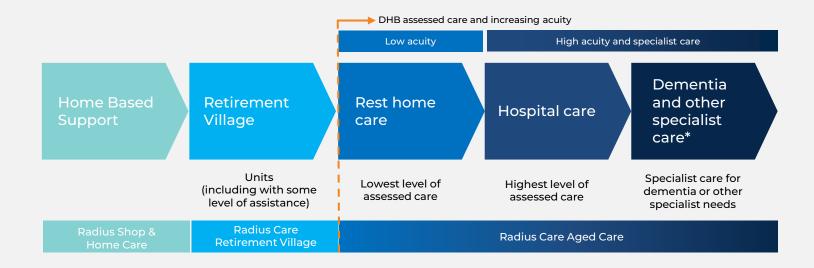

Radius Care is a leading provider of essential healthcare services to elderly New Zealanders in communities across the country.

Radius Care is focused on the high acuity and specialist care segment of the market (being hospital, dementia, psychogeriatric, physical and intellectual care). In addition, Radius Care also provides some in-home care services.

The high acuity and specialist care segment has the strongest expected demand growth, the highest per Care Bed EBITDA margins across the industry and strong barriers to entry.

Radius Care's offering provides specialised healthcare, as opposed to a focus on property development.

#### Our offerings in relation to the continuum of care

\*Other specialist care includes psychogeriatric, physical and intellectual care

FY24 Investor Presentation

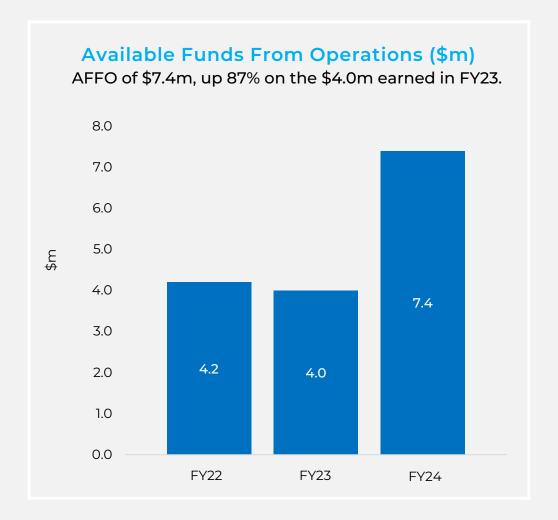

### Dividends and AFFO

#### **Dividends**

FY24 final dividend of 0.70 cents per share, including full imputation credits of 0.27 cents per share, was paid on 16 May 2024.

The payout ratio for the dividend is 27% of FY24 full year AFFO, which is below the target payout ratio of 50% to 70% of AFFO, due to the priorities earlier in FY24 of repaying debt and strengthening the balance sheet.

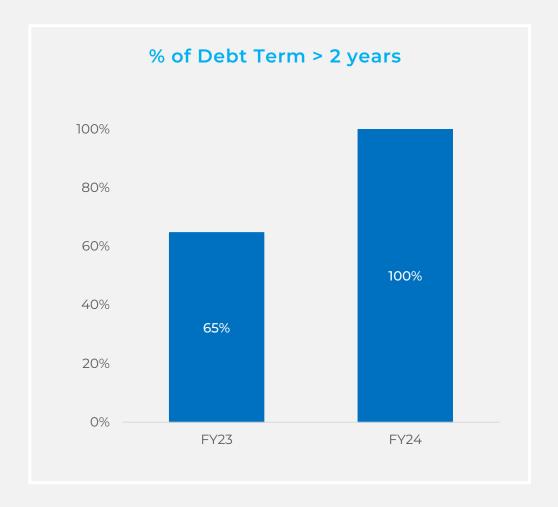

### Balance Sheet and Net Debt

#### \$3.5m in available headroom with average term of 2.8 years

## One-off *Deferred Tax* Adjustment

## Government Decision to Remove Tax Deductability of Depreciation on Commercial Buildings

- On 28 March 2024, the NZ Government legislated the removal of tax deductibility of depreciation on commercial buildings, with effect from the year ended 31 March 2025.
- Following this change, NZ IAS 12 requires recognition in FY24 of a one-off, non-cash deferred tax liability of \$11.3m.
- No additional FY24 Income Tax is payable as a result of the change in legislation.
- ASB has excluded this deferred tax adjustment from banking covenants.
- Without this non-cash, one-off impact, Net Profit After Tax is \$2.9m, representing a return to profitability following the Net Loss After Tax of \$2.1m in FY23.

## Industry Update

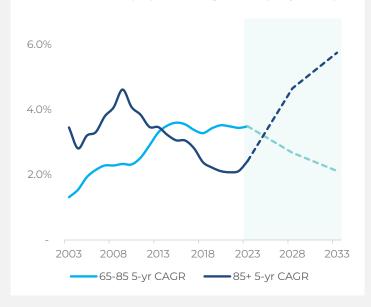

New Zealand has three clear favourable long-run tailwinds that will underpin high occupancy and organic growth.

#### Aging population

- NZ population aged >65 years forecast to grow at 2.7% p.a over the next decade
- NZ population aged >85 years forecast to grow at 5.2% p.a over the next decade

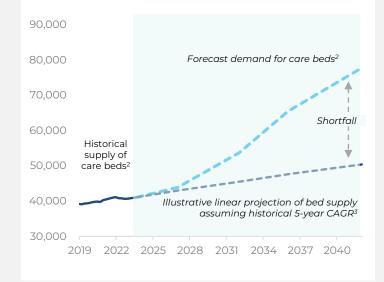

#### New Zealand population growth (65 years+)

#### **Supply shortfall<sup>2</sup>**

- Supply growth in New Zealand has been modest
- Projected demand for aged residential care beds is forecast to increase from c.40,000 to c.44,000 beds by 2027 and c.54,000 by 2032

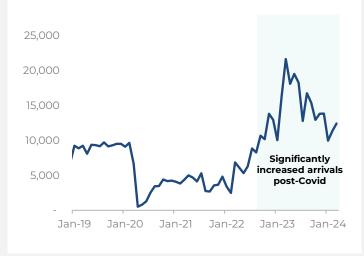

### Historical supply of beds vs forecast demand for beds

## Covid and immigration associated staffing shortages

- First operator to fill vacancies in 2023 once immigration resumed post-Covid
- Limited outbreaks, now effectively managed
- RConnect has enhanced staffing optimisation:
  - o Improved internal staff redistribution
  - Additional revenue stream established as RConnect acts as an external staffing bureau to other operators

### Bed Mix

87% of the portfolio are beds certified for high acuity and specialist care with significant flexibility of care.

This aligns with the sector dynamics of 'aging in place' reducing the need for rest home level care and increasing the need for higher acuity care.
